

Your future at your fingertips: cooperative, international, global Software Engineer (m/f/x)

MIC is leading worldwide in the automation of global customs and trade compliance processes. With our software solutions, we ensure safe and efficient customs clearance within the legal frameworks for more than 800 customers - like VW, Zalando, IKEA - on 6 continents.

Are you a Software Engineer who wants to utilize your personal and technical skill set and continuously grow in a self-organized agile environment? - Then join us and shape the future of our product suite!

As a Software Engineer in our product development, it is your mission to collaborate closely with experienced colleagues to design and consistently improve our Software solutions while embracing challenges with creative innovations.

Your job

- 🌐 As a Software Engineer, you plan new features within the team and implement them in bi-weekly sprints with a big emphasis on stability and long-term quality of our software
- 🌐 You work mainly with our core technologies, JavaEE and Oracle Databases (PL/SQL)
- 🌐 Depending on the team and your personal preference, you will also get to work with technologies like React, Kubernetes, Quarkus, Python, etc.
- 🌐 You have exciting development perspectives, such as Senior-/Lead Software Engineer
- 🌐 You have exciting development perspectives such as Senior-/Lead Software Engineer
